

RE-OPENING MALTA'S TOURISM INFRASTRUCTURE

PROCEDURES TO RE-INTRODUCE OPERATIONS ON THE PRINCIPLES OF SOCIAL DISTANCING, ENHANCED HYGIENIC PRACTICES AND MINIMISED INFECTION RISKS

Introduction

These Procedures have been formulated for a number of tourism establishments and other tourism receiving operations to ensure rigid compliance in the fields of social distancing, enhanced hygienic practices and the minimisation of COVID-19 infection risks by establishments and operations re-opening for domestic and foreign tourism use following their closure earlier this year.

The procedures have been formulated bearing the advice made available by the International and Maltese Health Authorities as well as by drawing from best practice from other tourism receiving countries which is being constantly monitored and updated.

The objective of these procedures is to make these establishments assume self-responsibility and accountability for the introduction of additional measures aimed at addressing this extraordinary situation in a way which enshrines them in their routine, day to day management and operational practices. Enforcement of conditions falls within remit of Malta Tourism Authority and the Health Authorities.

The opening of different types of tourism establishments and attractions will not take place at once but in line with the chronological sequence outlined in the National Transition Strategy.

Furthermore, establishments such as accommodation, may be required to re-introduce their services in stages, commencing from a core operation that may initially focus on availability of rooms served only through room service and eventually extend into other areas of operation including food and beverage, use of public areas and the use of specific facilities such as swimming pools, meetings facilities and wellness/fitness facilities.

The introduction of **sector-specific mandatory conditions and checklists** which need to be completed and signed on a regular basis and the availability of record logs and certificates to complement these checklists will ensure that the highest standards are kept and that a record to assist inspections in checking that commitments which have been signed for by management are being respected and applied.

The available checklists are for:

- **Accommodation Establishments (two separate sections for Collective Accommodation and Holiday Furnished Premises)**
- **Catering Establishments**
- **Outdoor Establishments including Lidos, Swimming Pools and Outside Entertainment Areas**
- **Beaches, Beach Establishments and Beach Concessions**

The document also contains an appendix with **Additional Notes and References** for consultation and use by establishments to enable them to keep abreast of developments and guidelines as updated from time to time.

SECTION 1:

COLLECTIVE ACCOMMODATION ESTABLISHMENTS

Mandatory conditions for Collective Accommodation Establishments

These following obligatory conditions are issued under the Public Health Act Chapter 465 of the Laws of Malta and the Malta Travel and Tourism Services Act Chapter 409 of the Laws of Malta and require strict adherence. Failure to adhere to these conditions will result in enforcement procedures as provided by these Acts.

Mandatory conditions to be observed in Collective Accommodation Establishments

The Superintendent of Public Health hereby orders that all Registered Outdoor Establishments including Lidos, Swimming Pools and Outside Entertainment Areas shall implement the measures listed in the Checklist appended to these conditions.

Guidelines for the application of COVID-19 mitigation measures in Collective Accommodation Establishments

All of the above establishments are being advised to operate in accordance with the conditions for good practice included in this document.

Such establishments usually involve the sale of goods or services to the public. These outlets include both areas where workers interact with customers and closed areas such as warehouses or distribution centres that may involve only minimal face-to-face contact with customers, supply chain delivery persons or fellow workers.

Principles for business continuity

Recognising that the COVID-19 pandemic is a public health emergency and that business continuity in respect of COVID-19 should be founded on expert public health advice and on social dialogue, the following principles shall apply:

- ✓ All workers, regardless of their occupation or how they are engaged, have the right to a healthy and safe working environment.
- ✓ The COVID-19 pandemic requires a focused approach to work health and safety as it applies to collective accommodation establishments.
- ✓ To keep the workplace healthy and safe, employers must, in consultation with workers and their representatives, assess the way they work to identify, understand and quantify risks and implement and review control measures that address those risks.
- ✓ As COVID-19 restrictions are gradually relaxed, employers and workers must work together to adapt and promote safe work practices consistent with advice from public health authorities and to ensure that collective accommodation establishments are ready for the social distancing and exemplary hygiene measures that are critical to the success of the transition.
- ✓ Employers and workers must actively control against the transmission of COVID-19 while at work, consistent with the updated advice from the public health authorities.

- ✓ Employers and workers must prepare for the possibility that there will be cases of COVID-19 in the workplace and be ready to respond immediately, appropriately, effectively and efficiently, and consistent with specific recommendations from public health authorities.

How COVID-19 spreads

COVID-19 presents with coughing or sneezing which release droplets of infected fluid. Most of these droplets can fall on nearby surfaces and objects - such as counters, display items, desks, tables, machinery or telephones. Other frequently touched surfaces such as door handles, trolleys, intercoms, lift buttons are other surfaces which are frequently touched by customers and employees and can become contaminated. People can catch COVID-19 by touching contaminated surfaces or objects – and then touching their eyes, nose or mouth. Standing within two metres of a person with COVID-19 for a prolonged period, one can catch the disease by breathing in droplets coughed out or exhaled by them. In other words, COVID-19 spreads in a similar way to flu. Most persons infected with COVID-19 experience mild symptoms and recover. However, some go on to experience more serious illness and may require hospital care. Risk of serious illness rises with age. People with weakened immune systems and people with conditions such as diabetes, heart and lung disease are also more vulnerable to serious illness.

Duties of the employers and workers

Employers are expected to take care of the health, safety and welfare of workers, including themselves, and all other staff, including contractors and delivery persons, clients and customers to collective accommodation establishments. This includes providing and maintaining a work environment that is without risk to health and safety, providing adequate and accessible facilities for the welfare of workers to carry out their work and monitoring the health of workers and the conditions of the workplace for the purpose of preventing illness or injury. Employers must minimise the risk of exposure to COVID-19 of workers and customers by taking reasonable and practical measures to mitigate risk.

Protection of workers from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring workers to practice social distancing
- ✓ Requiring workers to practice good hygiene (e.g., through workplace policies and ensuring access to adequate and well stocked hygiene facilities)
- ✓ Requiring workers to stay home when sick

- ✓ Cleaning the workplace regularly and thoroughly
- ✓ Implementing working from home arrangements for those aspects of the business where such arrangements can be applied

Employers must take actions to ensure that collective accommodation establishments do not put the health and safety of clients, customers, contractors and delivery persons at risk of contracting COVID-19. Such protection from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring them to practice social distancing, including through contactless deliveries and payments
- ✓ Requiring them to practice good hygiene, and
- ✓ Requiring others to stay away from the workplace, unless essential, e.g., such as family, friends and visitors.

Employers must maintain a safe work environment by, for example:

- ✓ Cleaning the workplace regularly and thoroughly,
- ✓ Restructuring the layout of the workplace to allow for social distancing,
- ✓ Limiting the number of people inside collective accommodation establishments at any given time,
- ✓ Providing adequate facilities to protect workers, as much as possible from contracting COVID-19 such as:
 - Toilet facilities including adequate supply of soap, water and paper towels
 - Hand sanitisers around the workplace, where it is not possible for workers to wash their hands,
 - Staff rooms (where applicable) that are regularly cleaned and that allow for social distancing,
- ✓ Providing workers with regular breaks to use sanitizing facilities, particularly to allow workers to wash their hands, or to access hand sanitiser where this is not possible,
- ✓ Providing information, training, instruction and supervision which may include:
 - guidance on how to properly wash hands
 - training on how to fit and use any necessary personal protective equipment (PPE)
 - training on adequate cleaning practices throughout the day
 - instructions on how to set up a safe home workplace for those working from home, and
- ✓ Providing workers with instructions on staying home from work if sick.

Employers have the duty to consult with workers on health and safety matters relating to COVID-19. Employers must give workers the opportunity to express their views and raise their concerns. Workers are most likely to know about the risks of their work. Involving them will help build commitment to any changes that employers need to implement. Employers must advise workers of the outcome of consultation. Adapting collective accommodation establishments to manage and mitigate the risk of exposure to COVID-19 requires a thorough risk assessment. These guidelines provide considerations that employers must make when deciding on control measures such as restrictions within collective accommodation establishments to allow for social distancing, the adequacy of facilities for proper personal hygiene, cleaning arrangements, working from home arrangements, and other changes that may affect the health and safety of workers. Consultation does not require consensus or agreement, but employers are strongly advised to allow workers to be part of the decision-making process for COVID-19 related matters.

COLLECTIVE ACCOMMODATION ESTABLISHMENTS CHECKLIST

Name of Establishment: _____

Checklist filled by: (Name) _____ (Position) _____

Date: _____

THIS CHECKLIST IS BEING PURPOSELY SUBDIVIDED INTO DIFFERENT AREAS OF ACCOMMODATION ESTABLISHMENT OPERATION DUE TO THE FACT THAT THE NATIONAL TRANSITION STRATEGY MAY DECIDE FOR THE GRADUAL AND PARTIAL RE-INTRODUCTION OF DIFFERENT HOTEL SERVICES. WHEN COMPLETING THIS CHECKLIST, THE RELEVANT SECTION(S) FOR SERVICES WHICH HAVE YET TO RECEIVE HEALTH AUTHORITIES' CLEARANCE TO OPERATE AS AT THE DATE OF COMPLETION ARE TO BE FILLED AS N/A (NOT APPLICABLE)

IN CASE OF ALL ESTABLISHMENTS: (SEE TECHNICAL NOTE AT THE END OF THIS DOCUMENT)

| | Yes/No | Date Certified |
|--|--------|----------------|
| Establishment certified clear of Legionella. | | |
| Test results, documentation and certification available. | | |

1. Reception and concierge: Availability of Information and Communication to Guests

| | Yes/No | Comments |
|---|--------|----------|
| Reception staff practicing physical distancing and regular hand sanitising. Reception staff, porters to wear masks and/or visors | | |
| Perspex barriers should be installed in the reception area with a height of at least 2m from the floor. | | |
| Reception desk possesses the telephone numbers of the public health authorities, hospitals and medical centres, public and private hospitals for use whenever there is the possibility that a guest may be ill. | | |
| Sanitising wipes for guest luggage for use by guests/porters. | | |
| Contactless Payment Methods available. | | |
| Central Key Card Deposit Box in Lobby for collection and disinfection of room keys. | | |

| | | |
|---|--|--|
| Temperature control on entrance with isolation of those with temperature more than 37.2 Celsius | | |
|---|--|--|

2. Necessary equipment and medical kit at the Reception desk

| | Yes/No | Comments |
|---|--------|----------|
| Germicidal disinfectant/wipes for surface cleaning. | | |
| Alcohol dispenser at Reception. Automatic dispensers are recommended | | |
| Visors are to be cleaned regularly with alcohol. Disposable face masks can only be used once. | | |
| Protective apron (disposable). | | |
| Full-length long-sleeved gown. | | |
| Biohazard disposable waste bag. | | |

3. Technical and maintenance services

ESTABLISHMENTS WILL NEED TO PRODUCE MAINTENANCE AND TESTING DOCUMENTS RELATING TO MICROBIOLOGICAL AND CHEMICAL WATER ANALYSIS AND PROVIDE RECORDS OF MAINTENANCE AND OPERATION PROCEDURES FOR DISHWASHING AND LAUNDRY EQUIPMENT AND AIR CONDITIONER MAINTENANCE

| | Yes/No | Comments |
|---|--------|----------|
| Water is disinfected: water for consumption and in pools. | | |
| No indoor pools or spas to be operated | | |
| Dishwashing and laundry equipment properly functioning: Operating temperatures is set at 60 Celsius and the correct dosage of cleaning and disinfecting chemicals is being applied. | | |
| Air-conditioning: Condition of filters monitored weekly and proper replacement rate of indoor air is maintained. The proper functioning of ventilation, air exchange, and dehumidification equipment is checked weekly. | | |
| Dispensers are checked every hour as a minimum to ensure the proper functioning. Dispensers include soap and disinfectant solution dispensers, disposable tissue dispensers, and similar devices. | | |

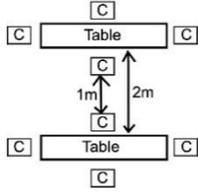

| | | |
|---|--|--|
| Install units to dispense disinfectant gel in the different areas of the hotel, including the public restrooms used by guests and by staff, and other areas of interest (e.g. entrance to outdoor restaurants). | | |
|---|--|--|

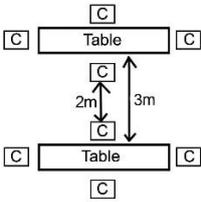

4. Public Areas

| | Yes/No | Comments |
|---|--------|----------|
| Documented, hourly anti-viral disinfection of high hand-contact areas (door handles, handrails, lift buttons, public phones etc). | | |
| Bins are recommended to be pedal operated and frequently emptied. | | |
| No air flow dryers or revolving cloth towels. Disposable paper towels only (ideally from an automated dispenser) | | |
| Furniture, fixtures and equipment placed to support social distancing and hygiene requirements. | | |
| Elevator social distancing enforced (2 metre distance per person). Sign at elevator entrance saying that only people in same party should use elevator together. Otherwise one person at a time | | |
| No new or indoor child play areas are allowed | | |

5. Restaurants, breakfast and dining rooms, bars (Outdoor service only/Indoor service only where outdoor service is not possible) and Staff Canteens

| | Yes/No | Comments |
|--|--------|----------|
| Staff personal hygiene protocol available for outdoor restaurant, or outdoor breakfast or dining room. . | | |
| Guests reminded when entering and leaving outdoor restaurant or outdoor breakfast or dining room to disinfect hands with disinfectant gel located at the entrance to those facilities. | | |
| Buffet service not offered. | | |
| Use of disposable condiments and single use items instead of bottles and containers (including oil, vinegar, sauces, salt and pepper, sugar and sweetener). Alternatively, single servings in bowls. | | |
| Extended service time to avoid guest crowding. | | |

| | | |
|--|--|--|
| Staggered break rota for staff to avoid canteen crowding. | | |
| No self-service dispensers or self-service inside and outside the establishment. | | |
| All dishes, silverware, and glassware used in every table sitting needs to be washed and disinfected in a dishwashing machine, including items that have not been used. Tablecloths and napkins have to be changed after every sitting. | | |
| In case of manual washing there is a wash, disinfect, rinse process in place. Drying carried out using disposable paper towels. Tablecloths and napkins washed in the usual manner. | | |
| Cigarette vending machines allowed as per applicable laws. However, a hand sanitiser is to be placed next to vending machine with directions to use both before and after use. | | |
| <p>FOR OUTDOOR DINING: Eating places to host maximum number of persons as established by the Superintendent of Public Health i.e.</p> <ul style="list-style-type: none"> ○ every person shall keep at least 2 metres from others <p>Tables to be limited to groups of not more than 6 persons or persons from the same household. Tables arranged so that the distance from the front of one chair to the front of the chair behind it shall be 2m apart and the back to back distance between chairs is to be 1m.</p>  | | |
| <p>FOR INDOOR DINING: Eating places to host maximum number of persons as established by the Superintendent of Public Health i.e.</p> <ul style="list-style-type: none"> ○ every person shall keep at least 2 metres from others ○ there shall be 1 client per 4 square metres in defined spaces, excluding staff | | |

| | | |
|---|--|--|
| <p>Tables to be limited to groups of not more than 6 persons or persons from the same household. Tables arranged so that the distance from the front of one chair to the front of the chair behind it shall be 3m apart and the back to back distance between chairs is to be 2m.</p>  | | |
| <p>Minimal material on guest tables for effective disinfection. Tables and chairs to be disinfected after each use.</p> | | |
| <p>Staff to wear masks and/or visors.</p> | | |
| <p>Replace menus and wine lists with single-use ones</p> | | |
| <p>No smoking shall be allowed at and within 10 metres of the seating area. Patrons are to exercise social distancing when smoking.</p> | | |

6. Pool deck (Outdoor Pools only, no spas)

| | Yes/No | Comments |
|--|--------|----------|
| <p>Disinfectant dispensers (preferably automatic), liquid soap and disposable paper towels provided.</p> | | |
| <p>Capacity to be limited to 50% of the maximum bathing load as stipulated in Schedule IV of LN129 of 2005</p> | | |
| <p>Staff at pools to wear visors.</p> | | |
| <p>Umbrellas, sun beds, chairs and other equipment are disinfected after every visitor leaves.</p> | | |
| <p>No crowding in common areas such as changing rooms and toilets. Public toilets and changing rooms to be disinfected every hour and limited to a maximum of 4 persons at any one time. Documentation to be kept on site logging disinfection times every hour.</p> | | |
| <p>2 metre distance in every direction between each 1 umbrella/2 sunbed unit in open area around pools. Only one person per sunbed.</p> | | |
| <p>No water attractions to be operated.</p> | | |

7. Guest Rooms and Room Service

| | Yes/No | Comments |
|---|--------|----------|
| Guest room decluttered of unnecessary items. | | |
| Hand Sanitiser either available as bathroom amenity or for sale in minibar. | | |
| Enhanced disinfection of high contact surfaces. | | |
| Use of soluble plastic bags for laundry for direct placing in washing machines. | | |
| Housekeeping trolleys covered between visits to protect contents. | | |
| Room Service use of disposable condiments and single use items. | | |
| Linen from Food tray removed. | | |
| Staff to wash hands before and after touching tray. | | |
| Room Service Bill signing replaced by sending bill straight to room. | | |

8. Availability of materials

ESTABLISHMENTS ARE TO MAINTAIN AND PROVIDE ATTENDANCE SHEETS SIGNED BY THE STAFF MEMBERS THAT HAVE BEEN BRIEFED ON OR TRAINED FOR THIS CONTINGENCY

| | Yes/No | Comments |
|--|--------|----------|
| Cleaning staff have been trained on the use of and provided with personal protection equipment as listed below: | | |
| Gloves. | | |
| Disposable gowns. | | |
| Closed shoes. | | |
| Facial protection (face shield or visor and impermeable aprons) for procedures that generate splashes (e.g. while washing surfaces). | | |
| Access to sufficient disinfectant solutions and other supplies. | | |

TECHNICAL NOTE RE WATER SYSTEMS IN ESTABLISHMENT

The following are the legal requirements to be carried out on the water systems prior re-opening of the premises:

1. Carry out a full system disinfection of the cold-water system, flushing through to all outlets to achieve 50 mg/l free chlorine for at least an hour checking that this level is achieved at the furthest outlets. This may be also achieved by making uses e.g. 5 mg/l for 10 hours (this all depends on the water piping system condition). It is important to top up when required throughout this process;
2. Flush out and refill the system to achieve maximum normal operating target levels of disinfection (equivalent to at least 0.2 mg/l free chlorine);
3. Refill and carry out a thermal shock by raising the temperature of the whole of the contents of the hot water storage heater from 70°C to 80°C then circulating this water throughout the system for up to three days. To be effective, the capacity and temperature of the hot water storage heater should be sufficient to ensure that the temperatures at the taps and appliances do not fall below 65°C. Each tap and appliance should be run sequentially for at least five minutes at the full temperature, taking appropriate precautions to minimise the risk of scalding;
4. Monitor temperatures and biocide levels where applicable, adjust where necessary, for at least 48-72 hours and then take *Legionella* samples from sentinel outlets (microbiological samples taken before 48 hours following disinfection may give false negative results);
5. Ensure you keep all documentation for inspection by the Competent Authority, including the review and update of the risk assessment manual including monitoring data, etc., with evidence of who carried out the monitoring, add time, date and signature;
6. Laboratory results for *Legionella* analysis which have to be carried out at an accredited laboratory, together with all the necessary documentation referred to in point 5 above and a declaration from the private water consultant under whom this water system treatment has been carried out are to be sent to the Water Regulatory and Auditing Unit within the Environmental Health Directorate prior reopening of the establishment;
7. Once it is found that your systems of the hot and cold water are under control then the establishment can reopen.

ADDITIONAL NOTES AND REFERENCES FOR ALL ESTABLISHMENTS

OPERATORS OF ESTABLISHMENTS ARE URGED TO FAMILIARISE THEMSELVES WITH THE FOLLOWING NOTES, GUIDANCE AND LEGAL OBLIGATIONS AND TO FOLLOW CHANGES AND UPDATES AS MAY BE ANNOUNCED BY THE AUTHORITIES FROM TIME TO TIME.

1. Link to guidance document on masks and visors

<https://deputyprimeminister.gov.mt/en/health-promotion/Documents/Guidance%20on%20the%20Use%20of%20Face%20Masks%20for%20decreasing%20COVID-19%20Transmission%20in%20the%20Community.pdf>

To wear the visor:

Step 1: Clean hands properly

Step 2: With clean hands put on the visor

Step 3: Remove the visor by pulling the string from behind

9 Remove **eye protection** by pulling the string from behind the head and dispose of it safely.

Step 4: Cleaning

How should one care for a face visor? Your face shield/visor should be cleaned after each use. Disinfect with alcohol wipes, disinfectant wipes, disinfectant spray or germicidal wipes. Then clean with soap and water and let dry before using again. Disposable face shields/visors may be used as long as they keep their shape and remain intact.

SECTION 2:

HOLIDAY FURNISHED PREMISES

Mandatory conditions for Holiday Furnished Premises

These following obligatory conditions are issued under the Public Health Act Chapter 465 of the Laws of Malta and the Malta Travel and Tourism Services Act Chapter 409 of the Laws of Malta and require strict adherence. Failure to adhere to these conditions will result in enforcement procedures as provided by these Acts.

Mandatory conditions to be observed in Holiday Furnished Premises

The Superintendent of Public Health hereby orders that all Registered Outdoor Establishments including Lidos, Swimming Pools and Outside Entertainment Areas shall implement the measures listed in the Checklist appended to these conditions.

Guidelines for the application of COVID-19 mitigation measures in Holiday Furnished Premises

All of the above establishments are being advised to operate in accordance with the conditions for good practice included in this document.

Such establishments usually involve the sale of goods or services to the public. These outlets include both areas where workers interact with customers and closed areas such as warehouses or distribution centres that may involve only minimal face-to-face contact with customers, supply chain delivery persons or fellow workers.

Principles for business continuity

Recognising that the COVID-19 pandemic is a public health emergency and that business continuity in respect of COVID-19 should be founded on expert public health advice and on social dialogue, the following principles shall apply:

- ✓ All workers, regardless of their occupation or how they are engaged, have the right to a healthy and safe working environment.
- ✓ The COVID-19 pandemic requires a focused approach to work health and safety as it applies to holiday furnished premises.
- ✓ To keep accommodation healthy and safe, employers must, in consultation with workers and their representatives, assess the way they work to identify, understand and quantify risks and implement and review control measures that address those risks.
- ✓ As COVID-19 restrictions are gradually relaxed, employers and workers must work together to adapt and promote safe work practices consistent with advice from public health authorities and to ensure that holiday furnished premises are ready for the social distancing and exemplary hygiene measures that are critical to the success of the transition.
- ✓ Employers and workers must actively control against the transmission of COVID-19 while at work, consistent with the updated advice from the public health authorities.
- ✓ Employers and workers must prepare for the possibility that there will be cases of COVID-19 in the workplace and be ready to respond immediately,

appropriately, effectively and efficiently, and consistent with specific recommendations from public health authorities.

How COVID-19 spreads

COVID-19 presents with coughing or sneezing which release droplets of infected fluid. Most of these droplets can fall on nearby surfaces and objects - such as counters, display items, desks, tables, machinery or telephones. Other frequently touched surfaces such as door handles, trolleys, intercoms, lift buttons are other surfaces which are frequently touched by customers and employees and can become contaminated. People can catch COVID-19 by touching contaminated surfaces or objects – and then touching their eyes, nose or mouth. Standing within two metres of a person with COVID-19 for a prolonged period, one can catch the disease by breathing in droplets coughed out or exhaled by them. In other words, COVID-19 spreads in a similar way to flu. Most persons infected with COVID-19 experience mild symptoms and recover. However, some go on to experience more serious illness and may require hospital care. Risk of serious illness rises with age. People with weakened immune systems and people with conditions such as diabetes, heart and lung disease are also more vulnerable to serious illness.

Duties of the employers and workers

Employers are expected to take care of the health, safety and welfare of workers, including themselves, and all other staff, including contractors and delivery persons, clients and customers to holiday furnished premises. This includes providing and maintaining a work environment that is without risk to health and safety, providing adequate and accessible facilities for the welfare of workers to carry out their work and monitoring the health of workers and the conditions of the workplace for the purpose of preventing illness or injury. Employers must minimise the risk of exposure to COVID-19 of workers and customers by taking reasonable and practical measures to mitigate risk.

Protection of workers from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring workers to practice social distancing
- ✓ Requiring workers to practice good hygiene (e.g., through workplace policies and ensuring access to adequate and well stocked hygiene facilities)
- ✓ Requiring workers to stay home when sick
- ✓ Cleaning the workplace regularly and thoroughly

- ✓ Implementing working from home arrangements for those aspects of the business where such arrangements can be applied

Employers must take actions to ensure that holiday furnished premises do not put the health and safety of clients, customers, contractors and delivery persons at risk of contracting COVID-19. Such protection from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring them to practice social distancing, including through contactless deliveries and payments
- ✓ Requiring them to practice good hygiene, and
- ✓ Requiring others to stay away from the workplace, unless essential, e.g., such as family, friends and visitors.

Employers must maintain a safe work environment in holiday furnished premises by, for example:

- ✓ Cleaning the workplace regularly and thoroughly,
- ✓ Restructuring the layout of the workplace to allow for social distancing,
- ✓ Limiting the number of people inside holiday furnished premises at any given time,
- ✓ Providing adequate facilities to protect workers, as much as possible from contracting COVID-19 such as:
 - Toilet facilities including adequate supply of soap, water and paper towels
 - Hand sanitisers around the workplace, where it is not possible for workers to wash their hands,
 - Staff rooms (where applicable) that are regularly cleaned and that allow for social distancing,
- ✓ Providing workers with regular breaks to use sanitizing facilities, particularly to allow workers to wash their hands, or to access hand sanitiser where this is not possible,
- ✓ Providing information, training, instruction and supervision which may include:
 - guidance on how to properly wash hands
 - training on how to fit and use any necessary personal protective equipment (PPE)
 - training on adequate cleaning practices throughout the day
 - instructions on how to set up a safe home workplace for those working from home, and
- ✓ Providing workers with instructions on staying home from work if sick.

Employers have the duty to consult with workers on health and safety matters relating to COVID-19. Employers must give workers the opportunity to express their views and raise their concerns. Workers are most likely to know about the risks of their work. Involving them will help build commitment to any changes that employers need to

implement. Employers must advise workers of the outcome of consultation. Adapting holiday furnished premises to manage and mitigate the risk of exposure to COVID-19 requires a thorough risk assessment. These guidelines provide considerations that employers must make when deciding on control measures such as restrictions within holiday furnished premises to allow for social distancing, the adequacy of facilities for proper personal hygiene, cleaning arrangements, working from home arrangements, and other changes that may affect the health and safety of workers. Consultation does not require consensus or agreement, but employers are strongly advised to allow workers to be part of the decision-making process for COVID-19 related matters.

HOLIDAY FURNISHED PREMISES CHECKLIST

Name of Establishment: _____

Checklist filled by: (Name) _____ (Position) _____

Date: _____

THIS CHECKLIST IS BEING PURPOSELY SUBDIVIDED INTO DIFFERENT AREAS OF ACCOMMODATION ESTABLISHMENT OPERATION DUE TO THE FACT THAT THE NATIONAL TRANSITION STRATEGY MAY DECIDE FOR THE GRADUAL AND PARTIAL RE-INTRODUCTION OF DIFFERENT SERVICES. WHEN COMPLETING THIS CHECKLIST, THE RELEVANT SECTION(S) FOR SERVICES WHICH HAVE YET TO RECEIVE HEALTH AUTHORITIES' CLEARANCE TO OPERATE AS AT THE DATE OF COMPLETION ARE TO BE FILLED AS N/A (NOT APPLICABLE).

IN CASE OF ALL ESTABLISHMENTS: (SEE TECHNICAL NOTE AT THE END OF THIS DOCUMENT)

| | Yes/No | Date Certified |
|--|--------|----------------|
| Establishment certified clear of Legionella. | | |
| Test results and certification available. | | |

1. Availability of Guest Information

| | Yes/No | Comments |
|---|--------|----------|
| Guest Information Pack possesses the telephone numbers of the public health authorities, hospitals and medical centres, public and private hospitals for use whenever there is the possibility that a guest may be ill. | | |
| Sanitising wipes for guest luggage for use by guests. | | |

2. Necessary equipment and medical kit available for Emergency Use in Premises

| | Yes/No | Comments |
|---|--------|----------|
| Germicidal disinfectant/wipes for surface cleaning. | | |
| Visiting maintenance and housekeeping staff to wear visors. Visors are to be cleaned regularly with alcohol. Disposable face masks can only be used once. | | |
| Gloves (disposable). | | |
| Protective apron (disposable). | | |
| Full-length long-sleeved gown. | | |
| Biohazard disposable waste bag. | | |
| Alcohol dispenser at public entrance. Automatic dispensers are recommended | | |

3. Technical and maintenance services

ESTABLISHMENTS WILL NEED TO PRODUCE MAINTENANCE AND TESTING DOCUMENTS RELATING TO MICROBIOLOGICAL AND CHEMICAL WATER ANALYSIS AND PROVIDE RECORDS OF MAINTENANCE AND OPERATION PROCEDURES FOR DISHWASHING AND LAUNDRY EQUIPMENT AND AIR CONDITIONER MAINTENANCE.

| | Yes/No | Comments |
|---|--------|----------|
| Water is disinfected: water for consumption and in pools. | | |
| Dishwashing and laundry equipment properly functioning. | | |
| Air-conditioning: Condition of filters monitored weekly and proper replacement rate of indoor air is maintained. The proper functioning of ventilation, air exchange, and dehumidification equipment is checked weekly. | | |
| Normal chlorination regime for outdoor pools. | | |
| Dispensers are checked weekly as a minimum to ensure the proper functioning. Dispensers include soap and disinfectant solution dispensers, disposable tissue dispensers, and similar devices. | | |
| Install units to dispense disinfectant gel in the premises. | | |

4. The Premises

| | Yes/No | Comments |
|---|--------|----------|
| Rooms decluttered of unnecessary items. | | |
| Hand Sanitiser either available as bathroom amenity or for sale in minibar. | | |
| Enhanced weekly disinfection of high contact surfaces. | | |
| Use of soluble plastic bags for laundry for direct placing in washing machines. | | |

5. Pool Deck (Outdoor Pools only, no spas)

| | Yes/No | Comments |
|---|--------|----------|
| Disinfectant dispensers (preferably automatic), liquid soap and disposable paper towels provided. | | |
| Capacity to be limited to 50% of the maximum bathing load as stipulated in Schedule IV of LN129 of 2005 | | |
| Staff at pools to wear visors. | | |
| Umbrellas, sun beds, chairs and other equipment are disinfected after every visitor leaves. | | |
| No crowding in common areas such as changing rooms and toilets. Public toilets and changing rooms to be disinfected every hour and limited to a maximum of 4 persons at any one time. Documentation to be kept on site logging disinfection times every hour. | | |
| 2 metre distance in each direction between each 1 umbrella/2 sunbed unit in open area around pools. Only one person per sunbed. | | |
| No water attractions to be operated. | | |

6. Availability of materials in case of infected person

ESTABLISHMENTS ARE TO MAINTAIN AND PROVIDE ATTENDANCE SHEETS SIGNED BY THE STAFF MEMBERS THAT HAVE BEEN BRIEFED ON TRAINED FOR THIS CONTINGENCY

| | Yes/No | Comments |
|---|--------|----------|
| Cleaning staff have been trained on the use of and provided with personal protection equipment as listed below: | | |
| Gloves. | | |
| Disposable gowns. | | |
| Closed shoes. | | |
| Facial protection (face shield and impermeable aprons) for procedures that generate splashes (e.g. while washing surfaces). | | |
| Access to sufficient disinfectant solutions and other supplies. | | |

TECHNICAL NOTE RE WATER SYSTEMS IN ESTABLISHMENT

The following are the legal requirements to be carried out on the water systems prior re-opening of the premises:

1. Carry out a full system disinfection of the cold-water system, flushing through to all outlets to achieve 50 mg/l free chlorine for at least an hour checking that this level is achieved at the furthest outlets. This may be also achieved by making uses e.g. 5 mg/l for 10 hours (this all depends on the water piping system condition). It is important to top up when required throughout this process;
2. Flush out and refill the system to achieve maximum normal operating target levels of disinfection (equivalent to at least 0.2 mg/l free chlorine);
3. Refill and carry out a thermal shock by raising the temperature of the whole of the contents of the hot water storage heater from 70°C to 80°C then circulating this water throughout the system for up to three days. To be effective, the capacity and temperature of the hot water storage heater should be sufficient to ensure that the temperatures at the taps and appliances do not fall below 65°C. Each tap and appliance should be run sequentially for at least five minutes at the full temperature, taking appropriate precautions to minimise the risk of scalding;
4. Monitor temperatures and biocide levels where applicable, adjust where necessary, for at least 48-72 hours and then take *Legionella* samples from sentinel outlets (microbiological samples taken before 48 hours following disinfection may give false negative results);
5. Ensure you keep all documentation for inspection by the Competent Authority, including the review and update of the risk assessment manual including monitoring data, etc., with evidence of who carried out the monitoring, add time, date and signature;
6. Laboratory results for *Legionella* analysis which have to be carried out at an accredited laboratory, together with all the necessary documentation referred to in point 5 above and a declaration from the private water consultant under whom this water system treatment has been carried out are to be sent to the Water Regulatory and Auditing Unit within the Environmental Health Directorate prior re-opening of the establishment;
7. Once it is found that your systems of the hot and cold water are under control then the establishment can reopen.

ADDITIONAL NOTES AND REFERENCES FOR ALL ESTABLISHMENTS

OPERATORS OF ESTABLISHMENTS ARE URGED TO FAMILIARISE THEMSELVES WITH THE FOLLOWING NOTES, GUIDANCE AND LEGAL OBLIGATIONS AND TO FOLLOW CHANGES AND UPDATES AS MAY BE ANNOUNCED BY THE AUTHORITIES FROM TIME TO TIME.

1. Link to guidance document on masks and visors

<https://deputyprimeminister.gov.mt/en/health-promotion/Documents/Guidance%20on%20the%20Use%20of%20Face%20Masks%20for%20decreasing%20COVID-19%20Transmission%20in%20the%20Community.pdf>

To wear the visor:

Step 1: Clean hands properly

Step 2: With clean hands put on the visor

Step 3: Remove the visor by pulling the string from behind

9 Remove eye protection by pulling the string from behind the head and dispose of it safely.

Step 4: Cleaning

How should one care for a face visor? Your face shield/visor should be cleaned after each use. Disinfect with alcohol wipes, disinfectant wipes, disinfectant spray or germicidal wipes. Then clean with soap and water and let dry before using again. Disposable face shields/visors may be used as long as they keep their shape and remain intact.

SECTION 3:

OUTDOOR CATERING ESTABLISHMENTS

Mandatory conditions for Outdoor Catering Establishments

These following obligatory conditions are issued under the Public Health Act Chapter 465 of the Laws of Malta and the Malta Travel and Tourism Services Act Chapter 409 of the Laws of Malta and require strict adherence. Failure to adhere to these conditions will result in enforcement procedures as provided by these Acts.

Mandatory conditions to be observed in Outdoor Catering Establishments

The Superintendent of Public Health hereby orders that all Registered Outdoor Establishments including Lidos, Swimming Pools and Outside Entertainment Areas shall implement the measures listed in the Checklist appended to these conditions.

Guidelines for the application of COVID-19 mitigation measures in Outdoor Catering Establishments

All of the above establishments are being advised to operate in accordance with the conditions for good practice included in this document.

Such establishments usually involve the sale of goods or services to the public. These outlets include both areas where workers interact with customers and closed areas such as warehouses or distribution centres that may involve only minimal face-to-face contact with customers, supply chain delivery persons or fellow workers.

Principles for business continuity

Recognising that the COVID-19 pandemic is a public health emergency and that business continuity in respect of COVID-19 should be founded on expert public health advice and on social dialogue, the following principles shall apply:

- ✓ All workers, regardless of their occupation or how they are engaged, have the right to a healthy and safe working environment.
- ✓ The COVID-19 pandemic requires a focused approach to work health and safety as it applies to outdoor catering establishments.
- ✓ To keep premises healthy and safe, employers must, in consultation with workers and their representatives, assess the way they work to identify, understand and quantify risks and implement and review control measures that address those risks.
- ✓ As COVID-19 restrictions are gradually relaxed, employers and workers must work together to adapt and promote safe work practices consistent with advice from public health authorities and to ensure that outdoor catering establishments are ready for the social distancing and exemplary hygiene measures that are critical to the success of the transition.
- ✓ Employers and workers must actively control against the transmission of COVID-19 while at work, consistent with the updated advice from the public health authorities.
- ✓ Employers and workers must prepare for the possibility that there will be cases of COVID-19 in the workplace and be ready to respond immediately,

appropriately, effectively and efficiently, and consistent with specific recommendations from public health authorities.

How COVID-19 spreads

COVID-19 presents with coughing or sneezing which release droplets of infected fluid. Most of these droplets can fall on nearby surfaces and objects - such as counters, display items, desks, tables, machinery or telephones. Other frequently touched surfaces such as door handles, trolleys, intercoms, lift buttons are other surfaces which are frequently touched by customers and employees and can become contaminated. People can catch COVID-19 by touching contaminated surfaces or objects – and then touching their eyes, nose or mouth. Standing within two metres of a person with COVID-19 for a prolonged period, one can catch the disease by breathing in droplets coughed out or exhaled by them. In other words, COVID-19 spreads in a similar way to flu. Most persons infected with COVID-19 experience mild symptoms and recover. However, some go on to experience more serious illness and may require hospital care. Risk of serious illness rises with age. People with weakened immune systems and people with conditions such as diabetes, heart and lung disease are also more vulnerable to serious illness.

Duties of the employers and workers

Employers are expected to take care of the health, safety and welfare of workers, including themselves, and all other staff, including contractors and delivery persons, clients and customers to outdoor catering establishments. This includes providing and maintaining a work environment that is without risk to health and safety, providing adequate and accessible facilities for the welfare of workers to carry out their work and monitoring the health of workers and the conditions of the workplace for the purpose of preventing illness or injury. Employers must minimise the risk of exposure to COVID-19 of workers and customers by taking reasonable and practical measures to mitigate risk.

Protection of workers from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring workers to practice social distancing
- ✓ Requiring workers to practice good hygiene (e.g., through workplace policies and ensuring access to adequate and well stocked hygiene facilities)
- ✓ Requiring workers to stay home when sick
- ✓ Cleaning the workplace regularly and thoroughly

- ✓ Implementing working from home arrangements for those aspects of the business where such arrangements can be applied

Employers must take actions to ensure that outdoor catering establishments do not put the health and safety of clients, customers, contractors and delivery persons at risk of contracting COVID-19. Such protection from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring them to practice social distancing, including through contactless deliveries and payments
- ✓ Requiring them to practice good hygiene, and
- ✓ Requiring others to stay away from the workplace, unless essential, e.g., such as family, friends and visitors.

Employers must maintain a safe work environment in outdoor catering establishments by, for example:

- ✓ Cleaning the workplace regularly and thoroughly,
- ✓ Restructuring the layout of the workplace to allow for social distancing,
- ✓ Limiting the number of people inside outdoor catering establishments at any given time,
- ✓ Providing adequate facilities to protect workers, as much as possible from contracting COVID-19 such as:
 - Toilet facilities including adequate supply of soap, water and paper towels
 - Hand sanitisers around the workplace, where it is not possible for workers to wash their hands,
 - Staff rooms (where applicable) that are regularly cleaned and that allow for social distancing,
- ✓ Providing workers with regular breaks to use sanitizing facilities, particularly to allow workers to wash their hands, or to access hand sanitiser where this is not possible,
- ✓ Providing information, training, instruction and supervision which may include:
 - guidance on how to properly wash hands
 - training on how to fit and use any necessary personal protective equipment (PPE)
 - training on adequate cleaning practices throughout the day
 - instructions on how to set up a safe home workplace for those working from home, and
- ✓ Providing workers with instructions on staying home from work if sick.

Employers have the duty to consult with workers on health and safety matters relating to COVID-19. Employers must give workers the opportunity to express their views and raise their concerns. Workers are most likely to know about the risks of their work. Involving them will help build commitment to any changes that employers need to

implement. Employers must advise workers of the outcome of consultation. Adapting outdoor catering establishments to manage and mitigate the risk of exposure to COVID-19 requires a thorough risk assessment. These guidelines provide considerations that employers must make when deciding on control measures such as restrictions within outdoor catering establishments to allow for social distancing, the adequacy of facilities for proper personal hygiene, cleaning arrangements, working from home arrangements, and other changes that may affect the health and safety of workers. Consultation does not require consensus or agreement, but employers are strongly advised to allow workers to be part of the decision-making process for COVID-19 related matters.

OUTDOOR CATERING ESTABLISHMENTS CHECKLIST

Name of Establishment: _____

Checklist filled by: (Name) _____ (Position) _____

Date: _____

THIS CHECKLIST IS BEING PURPOSELY SUBDIVIDED INTO DIFFERENT AREAS OF OPERATION DUE TO THE FACT THAT THE NATIONAL TRANSITION STRATEGY MAY DECIDE FOR THE GRADUAL AND PARTIAL RE-INTRODUCTION OF DIFFERENT HOTEL SERVICES. WHEN COMPLETING THIS CHECKLIST, THE RELEVANT SECTION(S) FOR SERVICES WHICH HAVE YET TO RECEIVE HEALTH AUTHORITIES' CLEARANCE TO OPERATE AS AT THE DATE OF COMPLETION ARE TO BE FILLED AS N/A (NOT APPLICABLE)

IN CASE OF ALL ESTABLISHMENTS: (SEE TECHNICAL NOTE AT THE END OF THIS DOCUMENT)

| | Yes/No | Date Certified |
|--|--------|----------------|
| Establishment certified clear of Legionella. | | |
| Test results and certification available. | | |

1. Counter: Availability of Information and Communication to Guests

| | Yes/No | Comments |
|---|--------|----------|
| Staff practicing physical distancing and regular hand sanitising. | | |
| Staff to wear masks and/or visors. | | |
| Counter desk possesses the telephone numbers of the public health authorities, hospitals and medical centres, public and private hospitals for use whenever there is the possibility that a guest may be ill. | | |
| Contactless Payment Methods available. | | |

2. Necessary equipment and medical kit at the Establishment

| | Yes/No | Comments |
|---|--------|----------|
| Germicidal disinfectant/wipes for surface cleaning. | | |
| Visors are to be cleaned regularly with alcohol. Disposable face masks can only be used once. | | |
| Gloves (disposable). | | |
| Protective apron (disposable). | | |
| Full-length long-sleeved gown. | | |
| Biohazard disposable waste bag. | | |

3. Technical and maintenance services

ESTABLISHMENTS WILL NEED TO PRODUCE MAINTENANCE AND TESTING DOCUMENTS RELATING TO MICROBIOLOGICAL AND CHEMICAL WATER ANALYSIS AND PROVIDE RECORDS OF MAINTENANCE AND OPERATION PROCEDURES FOR DISHWASHING AND LAUNDRY EQUIPMENT AND AIR CONDITIONER MAINTENANCE.

| | Yes/No | Comments |
|--|--------|----------|
| Water for public use is disinfected. | | |
| Dishwashing and laundry equipment properly functioning: Operating temperatures is set at 60 degrees Celsius and the correct dosage of cleaning and disinfecting chemicals is being applied. | | |
| Air-conditioning: Condition of filters monitored weekly and proper replacement rate of indoor air is maintained. The proper functioning of ventilation, air exchange, and dehumidification equipment is checked weekly. To keep log in room. | | |
| Alcohol dispenser at entrance and other public areas. Automatic dispensers are recommended. | | |
| Alcohol dispenser at entrance/exit to kitchen. | | |
| Dispensers are checked every hour as a minimum to ensure the proper functioning. Dispensers include soap and disinfectant solution dispensers, hand dryers, disposable tissue dispensers, and similar devices. | | |
| Install units to dispense disinfectant gel in the different areas of the establishment, including the public restrooms used by guests and by staff. | | |

4. Public Areas

| | Yes/No | Comments |
|--|--------|----------|
| Documented, hourly anti-viral disinfection of high hand-contact areas (door handles, hand rails, lift buttons, public phones etc). | | |
| Bins are recommended to be pedal operated and frequently emptied. | | |
| Elevator social distancing enforced (2 metre distance per person). Sign at elevator entrance saying that only people | | |

| | | |
|--|--|--|
| in same party should use elevator together. Otherwise one person at a time. | | |
| No air flow dryers or revolving cloth towels. Disposable paper towels only (ideally from an automated dispenser) | | |
| Furniture, fixtures and equipment placed to support social distancing and hygiene requirements. | | |
| No new or indoor child play areas are allowed | | |
| Public toilets to be disinfected every hour and limited to a maximum of 4 persons at any one time. Documentation to be kept on site logging disinfection times every hour. | | |

4. Food and Beverage Service (Outdoor service only/Indoor service only where outdoor service is not possible)

| | Yes/No | Comments |
|---|--------|----------|
| Staff personal hygiene protocol available for outdoor restaurants, breakfast and dining room. Outdoor service only and seated at tables. | | |
| Guests reminded when entering and leaving dining area to disinfect hands with disinfectant gel located at the entrance to those facilities. | | |
| Buffet service not offered. | | |
| Use of disposable condiments and single use items instead of bottles and containers (including oil, vinegar, sauces, salt, pepper, sugar and sweetener) | | |
| Extended service time to avoid guest crowding. Service time not to go beyond 23:00 hours. | | |
| No self-service dispensers or self-service inside and outside the establishment. | | |
| All dishes, silverware, and glassware used in every table sitting needs to washed and | | |

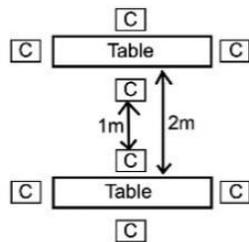

disinfected in a dishwashing machine, including items that have not been used. Tablecloths and napkins have to be changed after every sitting.

In case of manual washing there is a wash, disinfect, rinse process in place. Drying carried out using disposable paper towels. Tablecloths and napkins washed in the usual manner.

FOR OUTDOOR DINING: Eating places to host maximum number of persons as established by the Superintendent of Public Health i.e.

- every person shall keep at least 2 metres from others

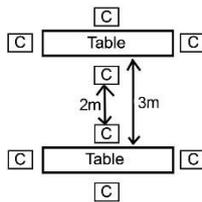

Tables to be limited to groups of not more than 6 persons or persons from the same household. Tables arranged so that the distance from the front of one chair to the front of the chair behind it shall be 2m apart and the back to back distance between chairs is to be 1m.

FOR INDOOR DINING: Eating places to host maximum number of persons as established by the Superintendent of Public Health i.e.

- every person shall keep at least 2 metres from others
- there shall be 1 client per 4 square metres in defined spaces, excluding staff

Tables to be limited to groups of not more than 6 persons or persons from the same household. Tables arranged so that the distance from the front of one chair to the front of the chair behind it shall be 3m apart and the back to back distance between chairs is to be 2m.

Minimal material on guest tables for effective disinfection. Tables and chairs to be disinfected after each use.

Staff to wear masks and/or visors.

Cigarette vending machines allowed as per applicable laws. However, a hand sanitiser is to be placed next to vending machine with directions to use both before and after use.

Replace menus and wine lists with single use ones

No smoking shall be allowed at or within 10 metres of the seating area. Patrons are to exercise social distancing when smoking

TECHNICAL NOTE RE WATER SYSTEMS IN ESTABLISHMENT

The following are the legal requirements to be carried out on the water systems prior re-opening of the premises:

1. Carry out a full system disinfection of the cold-water system, flushing through to all outlets to achieve 50 mg/l free chlorine for at least an hour checking that this level is achieved at the furthest outlets. This may be also achieved by making uses e.g. 5 mg/l for 10 hours (this all depends on the water piping system condition). It is important to top up when required throughout this process;
2. Flush out and refill the system to achieve maximum normal operating target levels of disinfection (equivalent to at least 0.2 mg/l free chlorine);
3. Refill and carry out a thermal shock by raising the temperature of the whole of the contents of the hot water storage heater from 70°C to 80°C then circulating this water throughout the system for up to three days. To be effective, the capacity and temperature of the hot water storage heater should be sufficient to ensure that the temperatures at the taps and appliances do not fall below 65°C. Each tap and appliance should be run sequentially for at least five minutes at the full temperature, taking appropriate precautions to minimise the risk of scalding;
4. Monitor temperatures and biocide levels where applicable, adjust where necessary, for at least 48-72 hours and then take *Legionella* samples from sentinel outlets (microbiological samples taken before 48 hours following disinfection may give false negative results);
5. Ensure you keep all documentation for inspection by the Competent Authority, including the review and update of the risk assessment manual including monitoring data, etc., with evidence of who carried out the monitoring, add time, date and signature;
6. Laboratory results for *Legionella* analysis which have to be carried out at an accredited laboratory, together with all the necessary documentation referred to in point 5 above and a declaration from the private water consultant under whom this water system treatment has been carried out are to be sent to the Water Regulatory and Auditing Unit within the Environmental Health Directorate prior re-opening of the establishment;
7. Once it is found that your systems of the hot and cold water are under control then the establishment can reopen.

SECTION 4:

**REGISTERED OUTDOOR ESTABLISHMENTS INCLUDING LIDOS,
SWIMMING POOLS AND OUTSIDE ENTERTAINMENT AREAS
EXCLUDING SPAS AND GYMS**

Mandatory conditions for Registered Outdoor Establishments including Lidos, Swimming Pools and Outside Entertainment Areas

These following obligatory conditions are issued under the Public Health Act Chapter 465 of the Laws of Malta and the Malta Travel and Tourism Services Act Chapter 409 of the Laws of Malta and require strict adherence. Failure to adhere to these conditions will result in enforcement procedures as provided by these Acts.

Mandatory conditions to be observed in Registered Outdoor Establishments including Lidos, Swimming Pools and Outside Entertainment Areas

The Superintendent of Public Health hereby orders that all Registered Outdoor Establishments including Lidos, Swimming Pools and Outside Entertainment Areas shall implement the measures listed in the Checklist appended to these conditions.

Guidelines for the application of COVID-19 mitigation measures in Registered Outdoor Establishments including Lidos, Swimming Pools and Outside Entertainment Areas

All of the above establishments are being advised to operate in accordance with the conditions for good practice included in this document.

Such establishments usually involve the sale of goods or services to the public. These outlets include both areas where workers interact with customers and closed areas such as warehouses or distribution centres that may involve only minimal face-to-face contact with customers, supply chain delivery persons or fellow workers.

Principles for business continuity

Recognising that the COVID-19 pandemic is a public health emergency and that business continuity in respect of COVID-19 should be founded on expert public health advice and on social dialogue, the following principles shall apply:

- ✓ All workers, regardless of their occupation or how they are engaged, have the right to a healthy and safe working environment.
- ✓ The COVID-19 pandemic requires a focused approach to work health and safety as it applies to outdoor establishments.
- ✓ To keep outdoor establishments healthy and safe, employers must, in consultation with workers and their representatives, assess the way they work to identify, understand and quantify risks and implement and review control measures that address those risks.
- ✓ As COVID-19 restrictions are gradually relaxed, employers and workers must work together to adapt and promote safe work practices consistent with advice from public health authorities and to ensure that outdoor establishments are ready for the social distancing and exemplary hygiene measures that are critical to the success of the transition.

- ✓ Employers and workers must actively control against the transmission of COVID-19 while at work, consistent with the updated advice from the public health authorities.
- ✓ Employers and workers must prepare for the possibility that there will be cases of COVID-19 in the workplace and be ready to respond immediately, appropriately, effectively and efficiently, and consistent with specific recommendations from public health authorities.

How COVID-19 spreads

COVID-19 presents with coughing or sneezing which release droplets of infected fluid. Most of these droplets can fall on nearby surfaces and objects - such as counters, display items, desks, tables, machinery or telephones. Other frequently touched surfaces such as door handles, trolleys, intercoms, lift buttons are other surfaces which are frequently touched by customers and employees and can become contaminated. People can catch COVID-19 by touching contaminated surfaces or objects – and then touching their eyes, nose or mouth. Standing within two metres of a person with COVID-19 for a prolonged period, one can catch the disease by breathing in droplets coughed out or exhaled by them. In other words, COVID-19 spreads in a similar way to flu. Most persons infected with COVID-19 experience mild symptoms and recover. However, some go on to experience more serious illness and may require hospital care. Risk of serious illness rises with age. People with weakened immune systems and people with conditions such as diabetes, heart and lung disease are also more vulnerable to serious illness.

Duties of the employers and workers

Employers are expected to take care of the health, safety and welfare of workers, including themselves, and all other staff, including contractors and delivery persons, clients and customers to outdoor establishments. This includes providing and maintaining a work environment that is without risk to health and safety, providing adequate and accessible facilities for the welfare of workers to carry out their work and monitoring the health of workers and the conditions of the workplace for the purpose of preventing illness or injury. Employers must minimise the risk of exposure to COVID-19 of workers and customers by taking reasonable and practical measures to mitigate risk.

Protection of workers from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring workers to practice social distancing

- ✓ Requiring workers to practice good hygiene (e.g., through workplace policies and ensuring access to adequate and well stocked hygiene facilities)
- ✓ Requiring workers to stay home when sick
- ✓ Cleaning the workplace regularly and thoroughly
- ✓ Implementing working from home arrangements for those aspects of the business where such arrangements can be applied

Employers must take actions to ensure that outdoor establishments do not put the health and safety of clients, customers, contractors and delivery persons at risk of contracting COVID-19. Such protection from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring them to practice social distancing, including through contactless deliveries and payments
- ✓ Requiring them to practice good hygiene, and
- ✓ Requiring others to stay away from the workplace, unless essential, e.g., such as family, friends and visitors.

Employers must maintain a safe work environment in outdoor establishments by, for example:

- ✓ Cleaning the workplace regularly and thoroughly,
- ✓ Restructuring the layout of the workplace to allow for social distancing,
- ✓ Limiting the number of people in outdoor establishments at any given time,
- ✓ Providing adequate facilities to protect workers, as much as possible from contracting COVID-19 such as:
 - Toilet facilities including adequate supply of soap, water and paper towels
 - Hand sanitisers around the workplace, where it is not possible for workers to wash their hands,
 - Staff rooms (where applicable) that are regularly cleaned and that allow for social distancing,
- ✓ Providing workers with regular breaks to use sanitizing facilities, particularly to allow workers to wash their hands, or to access hand sanitiser where this is not possible,
- ✓ Providing information, training, instruction and supervision which may include:
 - guidance on how to properly wash hands
 - training on how to fit and use any necessary personal protective equipment (PPE)
 - training on adequate cleaning practices throughout the day
 - instructions on how to set up a safe home workplace for those working from home, and
- ✓ Providing workers with instructions on staying home from work if sick.

Employers have the duty to consult with workers on health and safety matters relating to COVID-19. Employers must give workers the opportunity to express their views and raise their concerns. Workers are most likely to know about the risks of their work. Involving them will help build commitment to any changes that employers need to implement. Employers must advise workers of the outcome of consultation. Adapting outdoor establishments to manage and mitigate the risk of exposure to COVID-19 requires a thorough risk assessment. These guidelines provide considerations that employers must make when deciding on control measures such as restrictions within outdoor establishments to allow for social distancing, the adequacy of facilities for proper personal hygiene, cleaning arrangements, working from home arrangements, and other changes that may affect the health and safety of workers. Consultation does not require consensus or agreement, but employers are strongly advised to allow workers to be part of the decision-making process for COVID-19 related matters.

REGISTERED OUTDOOR ESTABLISHMENTS INCLUDING LIDOS, SWIMMING POOLS AND OUTSIDE ENTERTAINMENT AREAS CHECKLIST

Name of Establishment: _____

Checklist filled by: (Name) _____ (Position) _____

Date: _____

THIS CHECKLIST IS BEING PURPOSELY SUBDIVIDED INTO DIFFERENT AREAS OF OPERATION DUE TO THE FACT THAT THE NATIONAL TRANSITION STRATEGY MAY DECIDE FOR THE GRADUAL AND PARTIAL RE-INTRODUCTION OF DIFFERENT HOTEL SERVICES. WHEN COMPLETING THIS CHECKLIST, THE RELEVANT SECTION(S) FOR SERVICES WHICH HAVE YET TO RECEIVE HEALTH AUTHORITIES' CLEARANCE TO OPERATE AS AT THE DATE OF COMPLETION ARE TO BE FILLED AS N/A (NOT APPLICABLE)

| Visors are to be cleaned regularly with alcohol. Disposable face masks can only be used once. | | |
| Germicidal disinfectant/wipes for surface cleaning Tissues. | | |
| Gloves (disposable). | | |
| Protective apron (disposable). | | |
| Full-length long-sleeved gown. | | |
| Biohazard disposable waste bag. | | |

3. Technical and maintenance services

ESTABLISHMENTS WILL NEED TO PRODUCE MAINTENANCE AND TESTING DOCUMENTS RELATING TO MICROBIOLOGICAL AND CHEMICAL WATER ANALYSIS AND PROVIDE RECORDS OF MAINTENANCE AND OPERATION PROCEDURES FOR DISHWASHING AND LAUNDRY EQUIPMENT AND AIR CONDITIONER MAINTENANCE

| | Yes/No | Comments |
|--|--------|----------|
| Water is disinfected: water for consumption and in pools. | | |
| No spas to be operated | | |
| Dishwashing and laundry equipment properly functioning: Operating temperatures is set at 60 degrees Celsius and the correct dosage of cleaning and disinfecting chemicals is being applied. | | |
| Air-conditioning: Condition of filters monitored weekly and proper replacement rate of indoor air is maintained. The proper functioning of ventilation, air exchange, and dehumidification equipment is checked weekly. To keep log available. | | |
| Alcohol dispenser at entrance and other public areas. Automatic dispensers are recommended | | |
| Dispensers are checked every hour as a minimum to ensure the proper functioning. Dispensers include soap and disinfectant solution dispensers, disposable tissue dispensers, and similar devices. | | |

4. Public Areas

| | Yes/No | Comments |
|---|--------|----------|
| Documented, hourly anti-viral disinfection of high hand-contact areas (door handles, handrails, lift buttons, public phones etc). | | |
| Bins are recommended to be pedal operated and frequently emptied. | | |
| No air flow dryers or revolving cloth towels. Disposable paper towels only (ideally from an automated dispenser) | | |
| Elevator social distancing enforced (2 metre distance per person). Sign at elevator entrance saying that only people in same party should use elevator together. Otherwise one person at a time | | |
| No new or indoor child play areas are allowed | | |
| Furniture, fixtures and equipment placed to support social distancing and hygiene requirements. | | |

5. General Venue Procedures

| | Yes/No | Comments |
|--|--------|----------|
| Staff to wear protective masks visors | | |
| When clients leave tables and chairs sunbeds and umbrellas to be cleaned and disinfected | | |
| Disinfectant dispensers to be prominently placed for use by clients | | |
| All queues to practice social distancing of 2 metres | | |
| All toilets, changing rooms, refuse containers, common areas, appliances and other facilities to be cleaned and disinfected every hour as a minimum. | | |
| Limit the number of visitors to toilets at any one time | | |

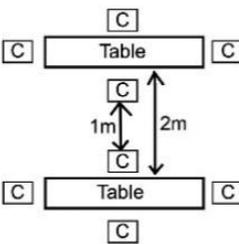

6. Pool-deck (Outdoor pools only no spas)

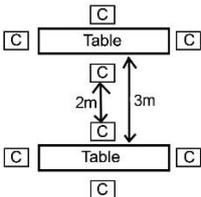

| | Yes/No | Comments |
|---|--------|----------|
| Disinfectant dispensers (preferably automatic), liquid soap and disposable paper towels provided. | | |

| | | |
|---|--|--|
| Capacity to be limited to 50% of the maximum bathing load as stipulated in Schedule IV of LN129 of 2005 | | |
| Staff at pools to wear visors. | | |
| Umbrellas, sun beds, chairs and other equipment are disinfected after every visitor leaves. | | |
| No crowding in common areas such as changing rooms and toilets. Public toilets and changing rooms to be disinfected every hour and limited to a maximum of 6 persons at any one time. Documentation to be kept on site logging disinfection times every hour. | | |
| 2 metre distance in every direction between each 1 umbrella/2 sunbed unit in open area around pools. Only one person per sunbed. | | |
| No water attractions to be operated. | | |

7. Dining Areas (Outdoor service only/Indoor service only where outdoor service is not possible)

| | Yes/No | Comments |
|---|--------|----------|
| Staff personal hygiene protocol available for restaurants and dining services. Outdoor service only and seated at tables. | | |
| Guests reminded when entering and leaving dining area to disinfect hands with disinfectant gel located at the entrance to those facilities. | | |
| Buffet service not offered. | | |
| Use of disposable condiments and single use items instead of bottles and containers. (including oil, vinegar, sauces, salt and pepper) Alternatively, single servings in bowls. | | |
| Extended service time to avoid guest crowding. Service time not to go beyond 23:00 hours. | | |
| All dishes, silverware, and glassware used in every table sitting needs to be washed and disinfected in a dishwashing machine, including items that have not been used. Tablecloths and napkins have to be changed after every sitting. | | |

| | | |
|---|--|--|
| <p>No self-service dispensers or self-service both inside and outside the establishment.</p> | | |
| <p>Cigarette vending machines allowed as per applicable laws. However, a hand sanitiser is to be placed next to vending machine with directions to use both before and after use.</p> | | |
| <p>In case of manual washing there is a wash, disinfect, rinse process in place. Drying carried out using disposable paper towels. Tablecloths and napkins washed in the usual manner.</p> | | |
| <p>FOR OUTDOOR DINING: Eating places to host maximum number of persons as established by the Superintendent of Public Health i.e.</p> <ul style="list-style-type: none"> ○ every person shall keep at least 2 metres from others <p>Tables to be limited to groups of not more than 6 persons or persons from the same household. Tables arranged so that the distance from the front of one chair to the front of the chair behind it shall be 2m apart and the back to back distance between chairs is to be 1m.</p>  <p>The diagram illustrates the required spacing for outdoor dining. It shows two rectangular tables arranged vertically. Each table has four chairs, one on each side. The distance between the front edge of the top table and the front edge of the bottom table is marked as 2m. The distance between the back edge of the top table and the back edge of the bottom table is marked as 1m. This ensures that the front-to-front distance between chairs is 2m and the back-to-back distance is 1m.</p> | | |

| | | |
|--|--|--|
| <p>FOR INDOOR DINING: Eating places to host maximum number of persons as established by the Superintendent of Public Health i.e.</p> <ul style="list-style-type: none"> ○ every person shall keep at least 2 metres from others ○ there shall be 1 client per 4 square metres in defined spaces, excluding staff <p>Tables to be limited to groups of not more than 6 persons or persons from the same household. Tables arranged so that the distance from the front of one chair to the front of the chair behind it shall be 3m apart and the back to back distance between chairs is to be 2m.</p>  | | |
| Staff to wear visors | | |
| Minimal material on guest tables for effective disinfection. Tables and chairs to be disinfected after each use. | | |
| Replace menus and wine lists with single use ones | | |

8. Availability of materials in case of infected person

ESTABLISHMENTS ARE TO MAINTAIN AND PROVIDE ATTENDANCE SHEETS SIGNED BY THE STAFF MEMBERS THAT HAVE BEEN BRIEFED ON TRAINED FOR THIS CONTINGENCY

| | Yes/No | Comments |
|---|--------|----------|
| Cleaning staff have been trained on the use of and provided with personal protection equipment as listed below: Gloves. Disposable gowns. Closed shoes. Facial protection (face shield and impermeable aprons) for procedures that generate splashes (e.g. while washing surfaces). | | |
| Access to sufficient disinfectant solutions and other supplies. | | |

TECHNICAL NOTE RE WATER SYSTEMS IN ESTABLISHMENT

The following are the legal requirements to be carried out on the water systems prior re-opening of the premises:

1. Carry out a full system disinfection of the cold-water system, flushing through to all outlets to achieve 50 mg/l free chlorine for at least an hour checking that this level is achieved at the furthest outlets. This may be also achieved by making uses e.g. 5 mg/l for 10 hours (this all depends on the water piping system condition). It is important to top up when required throughout this process;
2. Flush out and refill the system to achieve maximum normal operating target levels of disinfection (equivalent to at least 0.2 mg/l free chlorine);
3. Refill and carry out a thermal shock by raising the temperature of the whole of the contents of the hot water storage heater from 70°C to 80°C then circulating this water throughout the system for up to three days. To be effective, the capacity and temperature of the hot water storage heater should be sufficient to ensure that the temperatures at the taps and appliances do not fall below 65°C. Each tap and appliance should be run sequentially for at least five minutes at the full temperature, taking appropriate precautions to minimise the risk of scalding;
4. Monitor temperatures and biocide levels where applicable, adjust where necessary, for at least 48-72 hours and then take *Legionella* samples from sentinel outlets (microbiological samples taken before 48 hours following disinfection may give false negative results);
5. Ensure you keep all documentation for inspection by the Competent Authority, including the review and update of the risk assessment manual including monitoring data, etc., with evidence of who carried out the monitoring, add time, date and signature;
6. Laboratory results for *Legionella* analysis which have to be carried out at an accredited laboratory, together with all the necessary documentation referred to in point 5 above and a declaration from the private water consultant under whom this water system treatment has been carried out are to be sent to the Water Regulatory and Auditing Unit within the Environmental Health Directorate prior reopening of the establishment;
7. Once it is found that your systems of the hot and cold water are under control then the establishment can reopen.

ADDITIONAL NOTES AND REFERENCES FOR ALL ESTABLISHMENTS

OPERATORS OF ESTABLISHMENTS ARE URGED TO FAMILIARISE THEMSELVES WITH THE FOLLOWING NOTES, GUIDANCE AND LEGAL OBLIGATIONS AND TO FOLLOW CHANGES AND UPDATES AS MAY BE ANNOUNCED BY THE AUTHORITIES FROM TIME TO TIME.

1. Link to guidance document on masks and visors

<https://deputyprimeminister.gov.mt/en/health-promotion/Documents/Guidance%20on%20the%20Use%20of%20Face%20Masks%20for%20decreasing%20COVID-19%20Transmission%20in%20the%20Community.pdf>

To wear the visor:

Step 1: Clean hands properly

Step 2: With clean hands put on the visor

Step 3: Remove the visor by pulling the string from behind

9 Remove eye protection by pulling the string from behind the head and dispose of it safely.

Step 4: Cleaning

How should one care for a face visor? Your face shield/visor should be cleaned after each use. Disinfect with alcohol wipes, disinfectant wipes, disinfectant spray or germicidal wipes. Then clean with soap and water and let dry before using again. Disposable face shields/visors may be used as long as they keep their shape and remain intact.

SECTION 5:

BEACHES, BEACH ESTABLISHMENTS AND BEACH CONCESSIONS

Mandatory conditions for Beaches, Beach Establishments and Beach Concessions

These following obligatory conditions are issued under the Public Health Act Chapter 465 of the Laws of Malta and the Malta Travel and Tourism Services Act Chapter 409 of the Laws of Malta and require strict adherence. Failure to adhere to these conditions will result in enforcement procedures as provided by these Acts.

Mandatory conditions to be observed in Beaches, Beach Establishments and Beach Concessions

The Superintendent of Public Health hereby orders that all Registered Outdoor Establishments including Lidos, Swimming Pools and Outside Entertainment Areas shall implement the measures listed in the Checklist appended to these conditions.

Guidelines for the application of COVID-19 mitigation measures in Beaches, Beach Establishments and Beach Concessions

All of the above establishments are being advised to operate in accordance with the conditions for good practice included in this document.

Such establishments usually involve the sale of goods or services to the public. These outlets include both areas where workers interact with customers and closed areas such as warehouses or distribution centres that may involve only minimal face-to-face contact with customers, supply chain delivery persons or fellow workers.

Principles for business continuity

Recognising that the COVID-19 pandemic is a public health emergency and that business continuity in respect of COVID-19 should be founded on expert public health advice and on social dialogue, the following principles shall apply:

- ✓ All workers, regardless of their occupation or how they are engaged, have the right to a healthy and safe working environment.
- ✓ The COVID-19 pandemic requires a focused approach to work health and safety as it applies to beaches, beach establishments and beach concessions.
- ✓ To keep beaches, beach establishments and beach concessions healthy and safe, employers must, in consultation with workers and their representatives, assess the way they work to identify, understand and quantify risks and implement and review control measures that address those risks.
- ✓ As COVID-19 restrictions are gradually relaxed, employers and workers must work together to adapt and promote safe work practices consistent with advice from public health authorities and to ensure that beaches, beach establishments and beach concessions are ready for the social distancing and exemplary hygiene measures that are critical to the success of the transition.

- ✓ Employers and workers must actively control against the transmission of COVID-19 while at work, consistent with the updated advice from the public health authorities.
- ✓ Employers and workers must prepare for the possibility that there will be cases of COVID-19 in the workplace and be ready to respond immediately, appropriately, effectively and efficiently, and consistent with specific recommendations from public health authorities.

How COVID-19 spreads

COVID-19 presents with coughing or sneezing which release droplets of infected fluid. Most of these droplets can fall on nearby surfaces and objects - such as counters, display items, desks, tables, machinery or telephones. Other frequently touched surfaces such as door handles, trolleys, intercoms, lift buttons are other surfaces which are frequently touched by customers and employees and can become contaminated. People can catch COVID-19 by touching contaminated surfaces or objects – and then touching their eyes, nose or mouth. Standing within two metres of a person with COVID-19 for a prolonged period, one can catch the disease by breathing in droplets coughed out or exhaled by them. In other words, COVID-19 spreads in a similar way to flu. Most persons infected with COVID-19 experience mild symptoms and recover. However, some go on to experience more serious illness and may require hospital care. Risk of serious illness rises with age. People with weakened immune systems and people with conditions such as diabetes, heart and lung disease are also more vulnerable to serious illness.

Duties of the employers and workers

Employers are expected to take care of the health, safety and welfare of workers, including themselves, and all other staff, including contractors and delivery persons, clients and customers to beaches, beach establishments and beach concessions. This includes providing and maintaining a work environment that is without risk to health and safety, providing adequate and accessible facilities for the welfare of workers to carry out their work and monitoring the health of workers and the conditions of the workplace for the purpose of preventing illness or injury. Employers must minimise the risk of exposure to COVID-19 of workers and customers by taking reasonable and practical measures to mitigate risk.

Protection of workers from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring workers to practice social distancing
- ✓ Requiring workers to practice good hygiene (e.g., through workplace policies and ensuring access to adequate and well stocked hygiene facilities)

- ✓ Requiring workers to stay home when sick
- ✓ Cleaning the workplace regularly and thoroughly
- ✓ Implementing working from home arrangements for those aspects of the business where such arrangements can be applied

Employers must take actions to ensure that beaches, beach establishments and beach concessions do not put the health and safety of clients, customers, contractors and delivery persons at risk of contracting COVID-19. Such protection from the risk of exposure to COVID-19 may include, for example:

- ✓ Requiring them to practice social distancing, including through contactless deliveries and payments
- ✓ Requiring them to practice good hygiene, and
- ✓ Requiring others to stay away from the workplace, unless essential, e.g., such as family, friends and visitors.

Employers must maintain a safe work environment in beaches, beach establishments and beach concessions by, for example:

- ✓ Cleaning the workplace regularly and thoroughly,
- ✓ Restructuring the layout of the workplace to allow for social distancing,
- ✓ Limiting the number of people in beaches, beach establishments and beach concessions at any given time,
- ✓ Providing adequate facilities to protect workers, as much as possible from contracting COVID-19 such as:
 - Toilet facilities including adequate supply of soap, water and paper towels
 - Hand sanitisers around the workplace, where it is not possible for workers to wash their hands,
 - Staff rooms (where applicable) that are regularly cleaned and that allow for social distancing,
- ✓ Providing workers with regular breaks to use sanitizing facilities, particularly to allow workers to wash their hands, or to access hand sanitiser where this is not possible,
- ✓ Providing information, training, instruction and supervision which may include:
 - guidance on how to properly wash hands
 - training on how to fit and use any necessary personal protective equipment (PPE)
 - training on adequate cleaning practices throughout the day
 - instructions on how to set up a safe home workplace for those working from home, and
- ✓ Providing workers with instructions on staying home from work if sick.

Employers have the duty to consult with workers on health and safety matters relating to COVID-19. Employers must give workers the opportunity to express their views and

raise their concerns. Workers are most likely to know about the risks of their work. Involving them will help build commitment to any changes that employers need to implement. Employers must advise workers of the outcome of consultation. Adapting beaches, beach establishments and beach concessions to manage and mitigate the risk of exposure to COVID-19 requires a thorough risk assessment. These guidelines provide considerations that employers must make when deciding on control measures such as restrictions in beaches, beach establishments and beach concessions to allow for social distancing, the adequacy of facilities for proper personal hygiene, cleaning arrangements, working from home arrangements, and other changes that may affect the health and safety of workers. Consultation does not require consensus or agreement, but employers are strongly advised to allow workers to be part of the decision-making process for COVID-19 related matters.

BEACHES, BEACH ESTABLISHMENTS AND BEACH CONCESSIONS CHECKLIST

Name of Beach and Establishment: _____

Checklist filled by: (Name) _____ (Position) _____

Date: _____

THIS CHECKLIST IS BEING PURPOSELY SUBDIVIDED INTO DIFFERENT AREAS OF ESTABLISHMENT OPERATION DUE TO THE FACT THAT THE NATIONAL TRANSITION STRATEGY MAY DECIDE FOR THE GRADUAL AND PARTIAL RE-INTRODUCTION OF DIFFERENT SERVICES. WHEN COMPLETING THIS CHECKLIST, THE RELEVANT SECTION(S) FOR SERVICES WHICH HAVE YET TO RECEIVE HEALTH AUTHORITIES' CLEARANCE TO OPERATE AS AT THE DATE OF COMPLETION ARE TO BE FILLED AS N/A (NOT APPLICABLE)

IN CASE OF PRIVATE BEACH LYING WITHIN HOTEL GROUNDS AND BEACH ESTABLISHMENTS: (SEE TECHNICAL NOTE AT THE END OF THIS DOCUMENT)

| | Yes/No | Date Certified |
|--|--------|----------------|
| Establishment certified clear of Legionella. | | |
| Test Results and Certification available. | | |

1. Beach Supervisors Office/First Aid Clinic/Lifesavers Office and Towers

| | Yes/No | Comments |
|---|--------|----------|
| Staff practicing physical distancing and regular hand sanitising. | | |
| Staff wearing masks and/or visors | | |
| Visors are to be cleaned regularly with alcohol. Disposable face masks can only be used once. | | |
| Offices possess the telephone numbers of the health authorities, hospitals and medical centres, public and private hospitals for use whenever there is the possibility that a guest may be ill. | | |

2. Necessary equipment and medical kit at the Supervisors' Office

| | Yes/No | Comments |
|---|--------|----------|
| Germicidal disinfectant/wipes for surface cleaning. | | |
| Visors are to be cleaned regularly with alcohol. Disposable face masks can only be used once. | | |
| Protective apron (disposable). | | |
| Alcohol dispenser at entrance. Automatic dispensers are recommended | | |
| Full-length long-sleeved gown. | | |
| Biohazard disposable waste bag. | | |

3. Technical and maintenance services in Beach Establishments

ESTABLISHMENTS WILL NEED TO PRODUCE MAINTENANCE AND TESTING DOCUMENTS RELATING TO MICROBIOLOGICAL AND CHEMICAL WATER ANALYSIS AND PROVIDE RECORDS OF MAINTENANCE AND OPERATION PROCEDURES FOR DISHWASHING AND LAUNDRY EQUIPMENT AND AIR CONDITIONER MAINTENANCE

| | Yes/No | Comments |
|--|--------|----------|
| No spas to be operated | | |
| Dispensers are checked every hour as a minimum to ensure the proper functioning. Dispensers include soap and disinfectant solution dispensers, hand dryers, disposable tissue dispensers, and similar devices. | | |
| Install units to dispense disinfectant gel (preferably automated dispensing) in the different areas of the establishment, including the public restrooms used by guests and by staff, and other areas of interest (e.g. entrance to the dining area, restaurants, and bars). | | |

4. Public Areas

| | Yes/No | Comments |
|--|--------|----------|
| Documented hourly anti-viral disinfection of high hand-contact areas (handrails, lift buttons, public phones etc). | | |
| Bins are recommended to be pedal operated and frequently emptied. | | |

| | | |
|--|--|--|
| No air flow dryers or revolving cloth towels. Disposable paper towels only (ideally from an automated dispenser) | | |
| No new or indoor child play areas are allowed | | |
| Furniture, fixtures and equipment placed to support social distancing and hygiene requirements. | | |

5. Beach Specific

| | Yes/No | Comments |
|--|--------|----------|
| Beach cleaning to be undertaken daily and emptying of bins to be done twice daily followed by cleaning and disinfection of receptacles. | | |
| No portable toilets and showers to be used. Public toilets to be disinfected every hour and limited to a maximum of 4 persons at any one time. Documentation to be kept on site logging disinfection times every hour. | | |
| Installation of Information Boards on beach behaviour and Health and Hygiene information at regular intervals. | | |
| Daily disinfection of Supervisors' Offices, First Aid and Lifesaver Posts. | | |
| All beach staff to wear visors | | |
| All queues to practice social distancing of 2 metres | | |
| All refuse containers to be emptied and disinfected every hour as a minimum. | | |

6. Restaurant and dining services (Outdoor service only/Indoor service only where outdoor service is not possible)

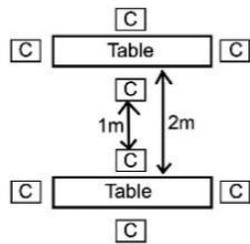

| | Yes/No | Comments |
|---|--------|----------|
| Staff personal hygiene protocol available for restaurant and dining services. Outdoor service only | | |
| Guests reminded when entering and leaving dining area to disinfect hands with disinfectant gel located at the entrance to those facilities. | | |

| | | |
|---|--|--|
| Buffet service not offered. No bar service except delivery on table | | |
| Use of disposable condiments and single use items instead of bottles and containers. (including oil, vinegar, sauces, salt and pepper) Alternatively, single servings in bowls. | | |
| All dishes, silverware, and glassware used in every table sitting needs to be washed and disinfected in a dishwashing machine, including items that have not been used. Tablecloths and napkins have to be changed after every sitting. | | |
| No self-service dispensers or self-service both inside and outside the establishment. | | |
| Cigarette vending machines allowed as per applicable laws. However, a hand sanitiser is to be placed next to vending machine with directions to use both before and after use. | | |
| In case of manual washing there is a wash, disinfect, rinse process in place. Drying carried out using disposable paper towels. Tablecloths and napkins washed in the usual manner. | | |

FOR OUTDOOR DINING: Eating places to host maximum number of persons as established by the Superintendent of Public Health i.e.

- every person shall keep at least 2 metres from others

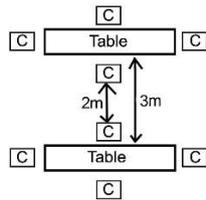

Tables to be limited to groups of not more than 6 persons or persons from the same household. Tables arranged so that the distance from the front of one chair to the front of the chair behind it shall be 2m apart and the back to back distance between chairs is to be 1m.

FOR INDOOR DINING: Eating places to host maximum number of persons as established by the Superintendent of Public Health i.e.

- every person shall keep at least 2 metres from others
- there shall be 1 client per 4 square metres in defined spaces, excluding staff

Tables to be limited to groups of not more than 6 persons or persons from the same household. Tables arranged so that the distance from the front of one chair to the front of the chair behind it shall be 3m apart and the back to back distance between chairs is to be 2m.

Staff to wear masks and/or visors

Minimal material on guest tables for effective disinfection. Tables and chairs to be disinfected after each use.

Replace menus and wine lists with single use ones

7. Concession Areas

| | Yes/No | Comments |
|--|--------|----------|
| Disinfectant dispensers, liquid soap and disposable towels must be provided. | | |
| Staff to wear visors | | |
| Umbrellas, sun beds, chairs and other equipment to be disinfected after every visitor leaves. | | |
| No crowding in common areas such as changing rooms and toilets. | | |
| No new or indoor child play areas are allowed | | |
| 2 metre distance in every direction between each 1 umbrella/2 sunbed unit. Only one person per sunbed. | | |
| No water features | | |

8. Availability of materials in case of infected person

ESTABLISHMENTS ARE TO MAINTAIN AND PROVIDE ATTENDANCE SHEETS SIGNED BY THE STAFF MEMBERS THAT HAVE BEEN BRIEFED ON TRAINED FOR THIS CONTINGENCY

| | Yes/No | Comments |
|---|--------|----------|
| Cleaning staff have been trained on the use of and provided with personal protection equipment as listed below: Gloves. Disposable gowns. Closed shoes. Facial protection (face shield and impermeable aprons) for procedures that generate splashes (e.g. while washing surfaces). | | |
| Access to sufficient disinfectant solutions and other supplies. | | |

9. Beachside Kiosks

To follow regulations issued by Health Authorities in terms of operating, distancing and disinfection/hygiene.

TECHNICAL NOTE RE WATER SYSTEMS IN ESTABLISHMENT

The following are the legal requirements to be carried out on the water systems prior re-opening of the premises:

1. Carry out a full system disinfection of the cold-water system, flushing through to all outlets to achieve 50 mg/l free chlorine for at least an hour checking that this level is achieved at the furthest outlets. This may be also achieved by making uses e.g. 5 mg/l for 10 hours (this all depends on the water piping system condition). It is important to top up when required throughout this process;
2. Flush out and refill the system to achieve maximum normal operating target levels of disinfection (equivalent to at least 0.2 mg/l free chlorine);
3. Refill and carry out a thermal shock by raising the temperature of the whole of the contents of the hot water storage heater from 70°C to 80°C then circulating this water throughout the system for up to three days. To be effective, the capacity and temperature of the hot water storage heater should be sufficient to ensure that the temperatures at the taps and appliances do not fall below 65°C. Each tap and appliance should be run sequentially for at least five minutes at the full temperature, taking appropriate precautions to minimise the risk of scalding;
4. Monitor temperatures and biocide levels where applicable, adjust where necessary, for at least 48-72 hours and then take *Legionella* samples from sentinel outlets (microbiological samples taken before 48 hours following disinfection may give false negative results);
5. Ensure you keep all documentation for inspection by the Competent Authority, including the review and update of the risk assessment manual including monitoring data, etc., with evidence of who carried out the monitoring, add time, date and signature;
6. Laboratory results for *Legionella* analysis which have to be carried out at an accredited laboratory, together with all the necessary documentation referred to in point 5 above and a declaration from the private water consultant under whom this water system treatment has been carried out are to be sent to the Water Regulatory and Auditing Unit within the Environmental Health Directorate prior re-opening of the establishment;
7. Once it is found that your systems of the hot and cold water are under control then the establishment can reopen.

APPENDIX 1: ADDITIONAL NOTES AND REFERENCES FOR ALL ESTABLISHMENTS

OPERATORS OF ESTABLISHMENTS ARE URGED TO FAMILIARISE THEMSELVES WITH THE FOLLOWING NOTES, GUIDANCE AND LEGAL OBLIGATIONS AND TO FOLLOW CHANGES AND UPDATES AS MAY BE ANNOUNCED BY THE AUTHORITIES FROM TIME TO TIME.

1. Link to guidance document on masks and visors

<https://deputyprimeminister.gov.mt/en/health-promotion/Documents/Guidance%20on%20the%20Use%20of%20Face%20Masks%20for%20decreasing%20COVID-19%20Transmission%20in%20the%20Community.pdf>

To wear the visor:

Step 1: Clean hands properly

Step 2: With clean hands put on the visor

Step 3: Remove the visor by pulling the string from behind

9 Remove eye protection by pulling the string from behind the head and dispose of it safely.

Step 4: Cleaning

How should one care for a face visor? Your face shield/visor should be cleaned after each use. Disinfect with alcohol wipes, disinfectant wipes, disinfectant spray or germicidal wipes. Then clean with soap and water and let dry before using again. Disposable face shields/visors may be used as long as they keep their shape and remain intact.
